

## Изпълнителна агенция "Проучване и поддържане на река Дунав"

Среднодневни температури на водата (t) в °C за река Дунав при хидрометрична станция Свищов за периода от 2000 до 2019 година.

Водомерната рейка се намира на km 554.300 с кога на нулата - 14.89 m във височинна система Балтийско море – Кроншад.
