

Изпълнителна агенция "Проучване и поддържане на река Дунав"

Среднодневни температури на водата (t) в °C за река Дунав при хидрометрична станция Силистра за периода от 2000 до 2019 година.
Водомерната рейка се намира на km 375.500 с kota на нулата - 6.27 m във височинна система Балтийско море – Кронцал.
